DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13,16-62, drawn to a method of decreasing QPRT expression in *Nicotiana* and plant thereof, classified in class 800, subclass 285.
- II. Claims 63-93, drawn to a method of increasing QPRT expression in *Nicotiana* and plant thereof, classified in class 800, subclass 317.3.
- III. Claims 14-15, drawn to a polypeptide having QPRT activity, classified in class 536, subclass 23.6.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of Groups I and II drawn to methods of increasing and decreasing QPRT expression in a plant and a peptide having QPRT activity are distinct because the peptide having QPRT activity cannot be used in the methods to regulate QPRT expression in a plant.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are Group I drawn to a method of decreasing QPRT expression in a plant and Group II drawn to a method of increasing QPRT expression in a plant, wherein the two methods have different method steps and different end products.

Art Unit: 1638

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classification, and the literature searches required for each of the Groups are not required for another of the Groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
